## Experience

### Operations Systems Tech Lead - Data and System Integration

Aug 2024 - June 2025

ONxpress Transportation Partners / Metrolinx

Toronto, ON

- Designed and implemented a department-wide test and analytics strategy used by a 40+ member team of engineers and managers to evaluate dataset performance, system integration, end-to-end functionality, and accessibility of the ONxpress software platform.
- Authored client submittals, Interface Control Documents (ICDs), and Confluence pages for 100+ staff, outlining KPIs, architecture, acceptance criteria, and cloud resources to ensure stakeholder alignment and reduce project delays by 25%.
- Led cross-functional collaboration between developers, testers, and business teams to ensure accurate data transmission by implementing validation protocols, reducing deployment time and recurring issues by 50%.
- Defined integration use cases and technical requirements with solution architects, ensured alignment with client specifications throughout the project lifecycle, and led client workshops to advance operational readiness.
- Evaluated mobile device solutions through A/B user testing to identify an optimal deployment aligned with client requirements, ensuring seamless system integration and achieving \$250K+ in procurement savings.
- Presented a proposal for data infrastructure and analytics tools to IT executives, successfully securing on-budget solutions to support testing, reporting, and governance for integration testing and analytics.

### Operations Systems Senior QA Analyst

Aug 2023 - Aug 2024

ONxpress Transportation Partners / Metrolinx

Toronto, ON

- Built ELT pipelines to integrate GPS, network, and operational data into client databases, optimizing SQL queries to improve processing efficiency by 75% and reduce manual data handling, resulting in seamless client updates.
- Developed and executed API validation scenarios across Azure and Oracle cloud environments, ensuring data integrity, interoperability, and alignment with functional requirements.
- Enhanced Jira-Zephyr integration within the ONxpress test workflow, improving collaboration and traceability while reducing defect resolution lead time by 20%.
- Designed interactive Power BI dashboards and real-time reports to track test coverage, defect trends, and overall progress, increasing visibility and improving communication with stakeholders.

### FPGA Software Analyst Intern

Sept 2021 - Sept 2022

Thales Group

Toronto, ON

- Developed and automated vehicle on-board controller (VOBC) software tests in C and Python, improving code quality through comprehensive black-box, white-box, and aggregate testing.
- Verified subsystem requirements and test scenarios to ensure full compliance during change request (CR) analysis.
- Automated VectorCAST unit test imports using Bash scripts, improving efficiency and reducing setup time by over 50% for the team.
- Collaborated in an Agile environment using IBM DOORS, Bitbucket, Jira, and Git to manage requirements and testing processes.

## Skills

**Languages:** Python, Bash, PowerShell, R, TypeScript, JavaScript, Java, C++

**Frameworks & CI/CD:** Git, GitHub Actions, GitLab, Jenkins, React, Next.js, Node.js

**Workflow:** Jira, Confluence, Kanban, Tableau, IBM DOORS

**AI & QA:** Claude, Copilot, LMStudio, Docker, Zephyr, Selenium, JMeter, JUnit

**Cloud & Virtualization:** Azure, Oracle Cloud, AWS, VirtualBox, VMware

**Databases:** MySQL, PostgreSQL, MongoDB

## Education

### Bachelor of Computer Science

Sept 2018 - April 2023

**Ontario Tech University**

- Recognized on President's list 2020-2023

## Projects

### DIY HomeLab | *pfSense, SNMP, NAS, Routing Protocols, VLAN, Firewall*

- Designed and configured a home lab with a DIY pfSense router, managed switches, SNMP monitoring and network-attached storage (NAS) to simulate enterprise-grade networking.
